

METAL FOR BUILDINGS

MODULAR PARTITIONS METAL PANELS

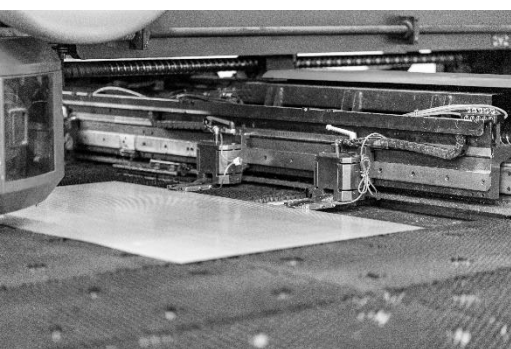

ECHAME, a factory for your partition projects

For more than 40 years, ECHAME has developed recognized French know-how in the design and manufacture of ceilings, partitions and metal cladding for building services.

ISO 9001 certified, we offer quality products that comply with construction requirements and which will integrate perfectly into all your projects.

In our 5,000 m² manufacturing plant, located near Lille in Hauts de France, we transform galvanized, electrogalvanized, pre-painted steel, stainless steel or aluminum in order to create your ceiling, your partitions or your decorative coverings.

Our sales team and our design office are there to support you and find the solution best suited to your project.

- ✓ Punching with automatic loading
- ✓ LASER cutting
- ✓ Bending up to 4m
- ✓ Paneling
- ✓ Automatic Polyester powder painting line

Adapted logistics

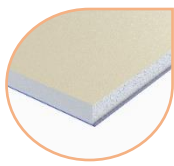

- ✓ Packing by floor or by zone according to your request
- ✓ Strapping and shrink film for perfect support of the pallet.
- ✓ Delivery by unpackable carrier to your depot or site
- ✓ Self-unloading truck or crane arm on request.

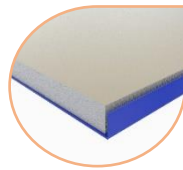

TYPES OF ECHAME PANELS

ECHAME manufactures sheet metal panels for designers and installers of modular partitions. Depending on your assembly principles and your structural profiles, ECHAME adapts its manufacturing to your needs.

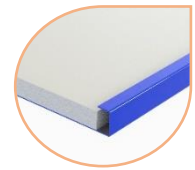

Robust, cleanable, durable, the sheet metal panel has many advantages and offers your partition sites an impeccable appearance.

Unedged panels for installation under joint cover

Single-fold edged panels for edge-to-edge installation

Double-fold edged panels for edge-to-edge installation

Filling :

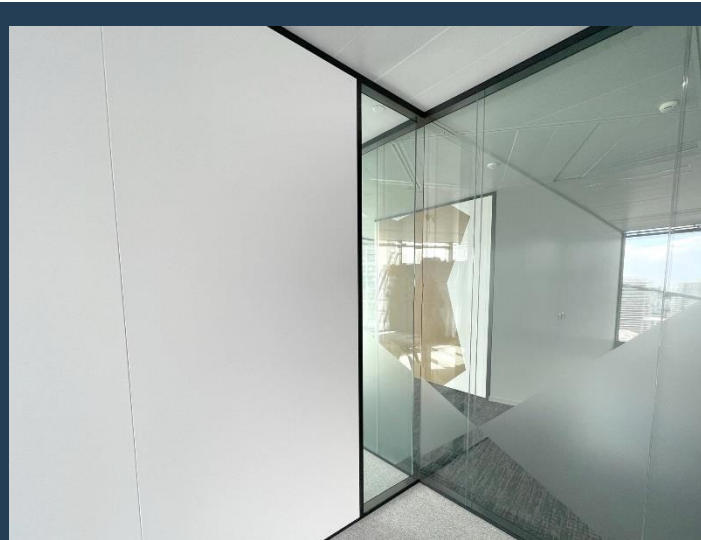

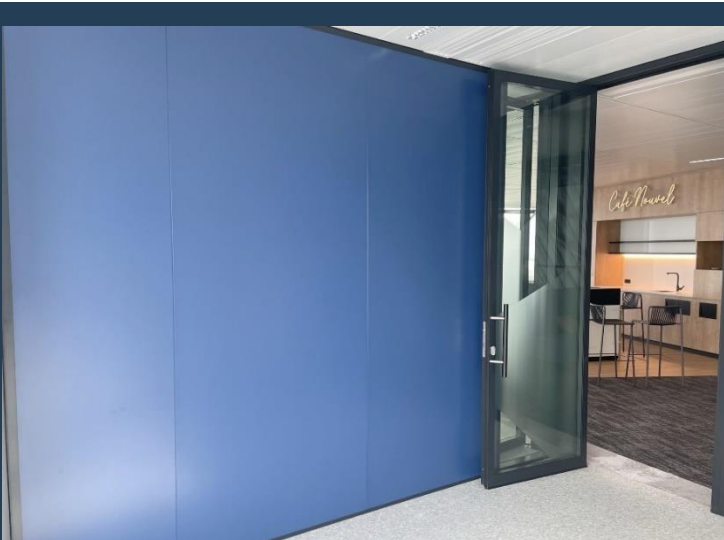

Plasterboard support 13 mm
Plasterboard support 10 mm
Fermacell® support 10 mm
Chipboard wood support 10 mm
Any other support on request
Factory glued with JOWACOLL 763.00

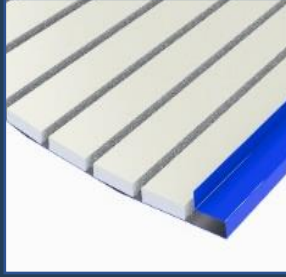

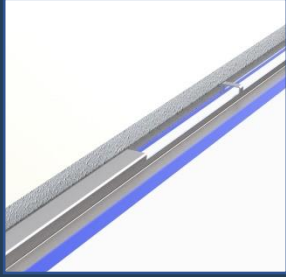

Materials :

Pre-painted galvanized steel
0.8 / 1 mm thick
Post-painted galvanized steel
0.8 / 1 mm thick

Dimensions :

Maximal width 1200 mm for unedged panels
Maximal width 1160 mm for double-fold edged panels
Lenght up to 3 m for standard panels

OPTIONS

- ✓ Steel sheet back for acoustic reinforcement
- ✓ Angle panels
- ✓ Custom cutouts
- ✓ Curved panels

Manufacturing partner of the biggest names in modular office partitions, ECHAME delivers partition panels with sheet metal covering for its assembly customers.

Color, texture, robustness, magnetable, writing, placed edge to edge. The advantages of the metal partition are numerous.

All post-lacquered products offered by ECHAME are painted in our workshops.

Our automated painting line meets the most demanding quality criteria for an exemplary level of finish.

ECHAME uses Interpon powder from AKZO NOBEL.

Powder coatings are environmentally friendly, they do not contain volatile organic compounds (VOCs) or toxic heavy metals such as lead or chromium.

RAL colors on request
